

Student Education Goals

Each student has the right to a free and appropriate public education. The district provides the best learning opportunities possible within the resources available. In addition to a full instructional program, learning opportunities include a wide range of student activities to stimulate the athletic, artistic and creative skills of students and to better prepare them for school to career transition.

In exchange for these opportunities, both students and their parents assume substantial responsibilities. In order to preserve an orderly and safe learning environment, students must abide by the reasonable rules and instructions of staff and will be held accountable for following all school rules and regulations. Any necessary corrective actions shall be applied fairly and shall be designed primarily to assist students in learning to make wise decisions about behavior and to assure a safe learning environment for all. Parents are encouraged to inquire about the successes and concerns of their children and to reinforce their learning at home by showing an active interest in their children's development.

Parents and educators are partners in children's education. To that end, both must strive to provide for the physical and mental well-being of all students.
